Selecting the product "My manufacturers" You can easily find which program you are running by selecting the manufacturer, which is the company or brand, that you bought or you can use a generic product, because "my manufacturers" is the easiest to use. However, if you are trying to register a specific program, follow the instructions in the other steps. Go to the manufacturers tab and you will find the desired manufacturer (i.e. Autodesk, Autocad, Maya, Fusion,...). If you want to register a generic product, just click on "My manufacturers". But if you already have a manufacturer, select the manufacturer you want to register. Insert a product number You can insert the product number of your program from the list (for example Autocad, Autodesk AutoCAD, Design, Fusion,...). Or you can use a generic product, because Autocad is the most used, so it's very easy to find a generic Autocad. In the case of Autocad,

System Requirements:

- Memory: 6 GB
- Resolution: 1280x720
- Processor: 1.6 GHz
- Operating System: Windows 7, Windows 8 or Windows 8.1 Update 1
- Performance: WONDERFUL, I am very pleased with it. It is very smooth and an excellent game. The PC version runs at great speed with good graphics and great sound. Now there is one minor glitch and that is that I had to change the video drivers and I am not sure what that did, because it has not happened since
