
LBE V5.1 Root ,

[Download](#)

The anti-theft module is tightly integrated with the LBE security wizard, installation mode support ROOT in active protection to open the case, message.swe to enter. Below we will consider the capabilities of all modules in comparison. Mirage-MC 10 software is a fully managed NVR with wired or wireless network access. Mirage-MS10 provides real-time video and works with 256 MB hard drives (DVD+R) and 2.5-inch hard drives. Miroslav MC10 can be controlled directly from the "Da Vinci" and "Panasonic" ACS programs. Each interface button has a light indication, which makes it easy to set the necessary configuration and add new registration events. Interface "Miroslav-MS 10" supports management using any modern PC or laptop. Miroslava MMS 10 is a fully managed network video surveillance system as part of an access control system that supports connecting external detectors to it to connect to a 3G modem or 3G / 4G Wi-Fi databases. Network surveillance camera Mirage MCS-11 (MG-110-A) is presented in infrared and color modes. By connecting several input video recorders into a single video surveillance system, you can observe over the network what is happening inside the facility. For video recording, it is possible to connect 4 video recording devices via a local network. There is a configurable IP video output for connecting to the Internet. Miroslava MC-11 is designed to be controlled from the ACS "DAS" software and is universal in working with any DVRs. To configure the settings of the DVR to work with network cameras, it is possible to "remove the load" on network video recorders. With simple and intuitive software control, you can set the required recording time, the number of video recording fields and the recording schedule by day of the week, set up scheduled recording and manually during recording. For registration and control of external objects (external sensors) there is a built-in WEB-server. The Mirav ACS software offers the possibility of displaying images from remote cameras on WEB monitors and video recorders. Settings are carried out using a graphical interface that allows you to manage or configure the device remotely. "Miroslava-MC 5" is just
